

## FOR REAL HUNTERS

Where other companies fall short and rely on their marketing to sell a bow, Prime uses quality materials, innovative engineering and above all hunter feedback to make a real change that makes a real difference for the bowhunter. But don't take it from us, take it from the real hunters who took a step outside of their comfort zone and made the switch. Hear real stories from real people at [www.G5Prime.com](http://www.G5Prime.com)

33" AXLE TO AXLE  
333 FPS SPEED (80 RATING)  
6.5" BRACE HEIGHT

## MAKING REAL CHANGE

For years now, Prime has been focused on making the most accurate bow possible. Addressing the real problems that real bowhunters have had and advancing our technology based on that. The parallel cam system that eliminates cam lean, center grip riser that decreases pin float, the flexis cable guard and 82X aluminum reducing bow torque that promotes dead straight nock travel.
